Stainless steel  
supremacy!

*Impressive design and high performance!*

- 18/10 material - 0,7mm thick in the body - 0,6mm thick in the lid
- Heat-storage: triple layer base with aluminium layer 3,5-6mm thick and a magnetic capsule (430 material) 3mm thick
- 10/1000 concave base which is ideal for all hobs
- Stainless steel handles, resistant to high temperatures
- Linen inner material, offering non-stick properties and higher resistance to scratches.
- Smooth and brushed stainless steel external finish
- Curved lids for improved steam circulation within the pot
- Suitable for all types of hobs: electric (iron hot plates), ceramic, gas and induction

Expert  
Plus  
*Gearing up taste!*

Expert Plus

## The new generation of pressure cookers!

- 18/10 material – 1 mm thick in the body and the lid
- New technologically advanced lid that secures easily anywhere on the pot rim, making the use of it easier and much simpler.
- The top part of the lid is a black Bakelite cover with soft-touch coating which adds to the aesthetics of the pressure cooker.
- Suitable for all types of hobs: electric (iron hot plates), ceramic, gas and induction

Evergreen

The ecological approach!

Evergreen

*Cookware, that ensures healthy nutrition and respects the environment.*

- Aluminium material 3,2mm thick for the pans and 4,0mm for the pots
- Manufactured at temperatures below 200 °C, limiting the carbonation of the environment.
- New ceramic coating, of German technology, without PTFE & PFOA or any heavy metals like cadmium, lead, chrome and mercury.
- Advanced non-stick properties
- High resistance to scratches, abrasion and high temperatures.
- Green enameled outer color and stainless steel handles.
- Suitable for all types of hobs: electric (hot iron plates), ceramic, gas and induction

*with ceramic coating*

Ceratech  
Ceramic technology!

Ceratech

## A step ahead in the kitchen!

- Aluminium material 3,0mm thick
- Cream ceramic inner coating and outer porcelain enameled - bordeaux color finish.
- Black Bakelite soft touch handles
- New ceramic coating by nanoparticles of silicon.
- Remarkable resistance to scratches, abrasion and high temperatures.
- Extremely smooth surface with increased non-stick properties
- Very easy to clean.
- Environmentally friendly production, occurring at low temperatures and resulting to reduction of CO<sub>2</sub> emissions in the atmosphere.
- Suitable for hobs: electric, ceramic and gas
